

## ► V2X Solution for VRU (Vulnerable Road Users)

Enable real-time information exchange among road users, effectively avoid dangers caused by blind spots and protect the vulnerable road users.

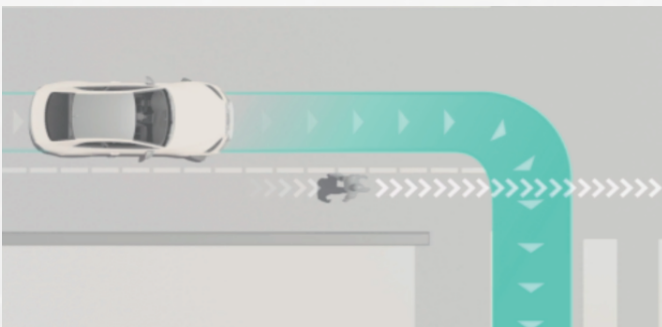

## ► Features

### ● VRU Collision Warning Function

JOYNEXT’s VRU collision warning function utilizes the V2N and V2P interfaces of 5G+V2X to send alert in advance to both vehicles and VRUs in real time.

01. Right turn blind zone anti-collision scenario

02. Left turn blind zone anti-collision scenario

03. Street crossing protection scenario

04. Reversing collision protection scenario
